

The **management of post-consumer plastic and aluminum packaging** has now become a global problem, and it must be managed involving and raising awareness all citizens.

For this reason, in 2020 has born the RiPET business: an industrial company active in environmental sustainability. Our primary aim is to guarantee **the protection of the environment and public health** by combining the professionalism and competence of our staff with the performance of our eco-compactors.

Our business stand out for its dynamism and high technological level in the implementation of **modern separate collection systems**; moreover we are careful to the achievement of **high percentages of collection and effective recycling of waste**.

The company focus leans towards a **constant implementation of our recycling system at level qualitative and quantitative**, as well as the improvement of the standards of separate collection in the places belonging to the catchment area served, through the development of innovative technologies and the consolidation of existing ones.

The collection system implemented by RiPET also makes it possible to **actively involve the citizen in the collection and disposal of waste material**, thus allowing each individual to do their part in terms of environmental protection and to feel an integral part of a community that works for the future.

The **RiPET eco-compactor** is a technologically advanced tool, designed to be simple to use and to be connected to the network 24h on 24h, allowing the **complete traceability of the packaging collected from the machine**.

Given the complete traceability of the waste introduced, our compactors reflect the trappings of **industry 4.0** giving buyers the opportunity to access the tax breaks connected.
